

SUSTAINABLE PLANET

THE GLOBAL STAGE FOR INNOVATION

PRODUCED BY CEA

GROWING GREEN BUSINESSES

Sustainable Planet at the 2012 International CES serves as the premier location for world-changing technologies that benefit the environment, utilize new forms of sustainable energy, renew our resources and contribute to the development of nations both on and off the grid.

If your products and services make it possible for every person on this planet to stay connected, informed and live sustainable lifestyles, this TechZone is the ideal place for you to exhibit at CES.

According to CEA market research, one in three consumers plan to purchase some type of green CE product over the next 12 months. Give your product the exposure to make it to the top of their list.

Exhibit today and meet more than 140,000 industry leaders consisting of buyers, distributors, developers, press and more.

SUSTAINABLE PLANET WILL FEATURE:

- Advances in green building
- Alternative energy technologies
- Green business services and solutions
- Smart grid technologies
- Solar and renewable products
- Sustainable packaging
- Wireless convergence
